

Who We Are

TriMedx Foundation is a not-for-profit organization dedicated to providing medical technology support and teaching basic troubleshooting skills to mission hospitals at poverty-stricken nations.

We do so by partnering with people like you, repurposing and maximizing your resources and expertise. Our mission projects include:

- Equipment repair and installation in third-world countries.
- Teaching basic troubleshooting to mission hospital staff so they can maintain their own medical equipment programs.
- Consulting with hospitals and other healthcare organizations involved in mission projects.
- Facilitating equipment redeployment through partnerships with medical surplus recovery organizations.

Mission

Committed to being the hands and feet of Jesus Christ, TriMedx Foundation partners with hospitals that care for the poor and vulnerable in the developing world. By providing equipment repair services and medical technology support, we enable hospitals to raise their level of care and serve those most in need.

Core Values

- Service of the Poor
- Integrity
- Wisdom
- Dedication
- Reverence
- Creativity

hope and health
through medical technology support

The Urgent Need

Imagine your child, in need of immediate medical attention. You walk for days to the closest hospital, just to find out the equipment needed to diagnose, treat or save your child's life is broken. Such is the reality of 80 percent of the world's population.

The urgent need for working medical equipment in poverty-stricken countries far exceeds the need for doctors. Without functioning equipment, local hospitals are unable to diagnose and treat patients, resulting in extended illness or even death. And without trained staff to make equipment repairs or the proper means to recycle devices, it comes as no surprise that half of the medical equipment in developing nations is not functional and left to rust and leak toxins.

That's where TriMedx Foundation comes in, committed to help end this unnecessary suffering and raise hope and health through medical technology support.

How You Can Save Lives

Hurting patients are waiting for your support.

Donate now at trimedxfoundation.org or 866-855-2580.

Save lives

Your contribution enables volunteer biomedical engineers to help mission sites by installing and repairing medical equipment, and teaching basic troubleshooting skills to help ensure life-saving medical equipment is fully functional, in turn saving lives. The average cost for a seven-day mission trip is \$3,200.

Your contributions will help fund the following mission travel expenses:

\$1,200	Flight to overseas destination
\$600	Immunizations
\$700	Accommodations
\$200	Meals for week
\$150	Vehicle transportation
\$100	Incidentals
\$50	Visa for destination country
<hr/> \$3,000	

Equipment support needed for trips:

\$100	Test equipment transportation
\$100	Shipping of replacement parts
<hr/> \$200
